

Email marketing is a highly effective way to get more clients for your Company and produces a tremendous return on your investment.

If you run a campaign the right way, you can expect to generate  
**\$40 for every \$1 spent.**

Two of the biggest issues that companies face with their approach to email marketing are quality content and campaign consistency. This is where Commexis' expertise makes the difference. We will run two types of campaigns for your Company.

1.

**Email Newsletter Blast** – This is sent to everyone you have permission to contact. Commexis will work with you to develop a monthly newsletter that will add value to the reader and keep your Company top-of-mind. These newsletters may include content such as Company news and announcements, special offers, changes that effect your customers or other advisory or general information.

2.

**Targeted Email** – This email effort will directly target prospects who have shown interest in a specific offering or service. The goal of this targeted email is to educate the reader on your services and to help answer specific questions that address their pain points and why they should contact your Company.

When you employ the right email campaign, you are not only building credibility with your current and potential clients, but you are also keeping your Company top-of-mind when they are ready to make a decision to utilize your services.

Commexis email packages are affordable, highly effective and adhere to ethical practice procedures, making them an ideal marketing vehicle for your Company.

**Our campaigns include:**

- Account set up
- Creative template design – branded to look like your site
- Coding/testing your current database
- Database/list management
- Custom content for each email blast
- Assistance with generating more emails via your website
- Campaign reporting
- And more....

Prices start as low as \$300 a month

Contact Commexis today and put that email list to use.
